SUMMARY

Focused and detail-oriented and process-oriented professional with over 4 years of experience in cloud services, CI/CD automation, and monitoring systems using AWS and Azure. Proficient in Ansible, Dynatrace, Jenkins, Docker, and GitHub, streamlining complex deployment systems. Specialising in infrastructure operations with a track record of 100% uptime. Developed web applications and migrated cloud services, resulting in significant cost savings. Eager to contribute to Google's infrastructure team by leveraging technical skills and innovative solutions.

EXPERIENCE

*Love My Robot, **DevOps & Cloud Infrastructure Engineer** | **AWS & Azure Specialist** | **CI/CD Automation Expert***
2020 - Present

- Developed, implemented, and maintained full CI/CD pipelines using Jenkins, Docker, and GitHub Actions, boosting deployment frequency and reducing release cycles by over 40%.
- Spearheaded the migration of on-premise services to AWS, achieving 30% cost savings through compute, storage, and networking resource optimization.
- Managed infrastructure as code (IaC) using Terraform, ensuring consistency and reproducibility of development, staging, and production environments.

*Axiata Digital Labs, **Managed Services Engineer***
Feb 2023 - Aug 2023

- Developed and deployed automated test scripts in Python and Selenium, reducing sanity test time by 50%, accelerating release validation processes, and enhancing software quality assurance.
- Regularly monitored and governed mission-critical IT infrastructure using Prometheus, Kibana, and Dynatrace, ensuring 100% system availability, early fault detection, and stable system performance for critical business applications.
- Provide 24/7 rota-based incident monitoring and troubleshoot and escalation team.
- Led the whole incident life cycle by creating, tracking, and closing service requests using ITSM tools, following SLAs and with transparent communication to internal stakeholders.

*Virtusa, **Associate Infrastructure Operations Engineer***
2021 - 2023

- Proactively monitored and maintained enterprise-level infrastructure systems using SolarWinds and Dynatrace, achieving 100% system uptime and defect-free performance in mission-critical environments.
- Managed the entire incident management lifecycle, including the creation, classification, and escalation of service tickets using ServiceNow, ensuring strict adherence to SLAs and timely status communication to stakeholders.
- Coordinated with third-party vendors and in-house support teams to identify root causes, troubleshoot complex infrastructure issues, and create long-term corrective actions to prevent future outages.

*Geoinformatics International Pvt Ltd, **Web Developer***
2017 - 2021

- Developed, designed, and deployed interactive web applications in PHP, JavaScript, HTML5, and CSS3, ensuring compliance with client requirements and UI/UX best practices.
- Migrated numerous web applications from Rackspace cloud infrastructure to AWS, realizing a cost saving of 40% on hosting through effective resource planning, auto-scaling, and S3/EC2 optimization.
- Collaborated with cross-functional teams to build dynamic, map-enabled web applications for urban planning and remote sensing, enhancing project efficiency and accuracy.

EDUCATION

Purdue University
Postgraduate Certificate • **DevOps** • Oct 2025 - Present

British Computer Society (BCS) The Chartered Institute for IT
Professional Graduate Diploma (UK undergraduate degree equivalent) • 2022 - Present

LICENSES & CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900)

Issued 2022

Elements of AI

University of Helsinki • Issued 2021

SKILLS

Cloud Infrastructure & Services • DevOps & Automation Engineering • Monitoring, Logging & Observability • Scripting & Software Development • Database Management • Containerisation & Orchestration • Version Control & Collaboration • Agile & ITSM Practices • Prometheus • Dynatrace
